

| KSR 50

ANTI – MATERIAL SNIPER

The KSR50 is a 12.7×99mm NATO bolt-action precision rifle, intended for long-range target engagement. Its solid, monolithic receiver and free-floating, heavy-contour, match-grade precision barrel ensure unparalleled precision in a lightweight package. It combines a high capacity magazine with the proven hard-hitting 0.50 BMG round to provide unmatched battlefield versatility as anti-material, as well as ultra-long range and counter-sniper platform. The fully adjustable buttstock increases carrying comfort and transportability in folded condition. Ambidextrous fire controls, safety, and magazine release, drastically improve ease of operation. Cheek-piece, butt plate and trigger position/weight are configurable by the operator.
